Professional Summary

Computer Science undergraduate (AI & ML) and Python Full Stack Developer with hands-on experience in HTML5, CSS3, JavaScript, Oracle SQL, MySQL, data analytics, and visualization. Seeking entry-level or internship opportunities in Software / Full Stack Development.

Education

B.Tech in Computer Science (AI & ML)

2022 – 2026

Sri Venkateswara College of Engineering, Tirupati

Aggregate: 90.01%

Internship Experience

AI – Data Quality Analyst Intern

2 Months

Rooman Technologies Pvt. Ltd., Bangalore

- Performed data validation, cleansing, and annotation on AI/ML datasets, ensuring accuracy, consistency, and reliability.
- Conducted data quality analysis and built Power BI dashboards to monitor key data quality metrics.

Python Development Intern

1 Month

TechnoHacks EduTech

- Developed Python mini-projects — **Calculator**, **Password Generator**, and **Rock Paper Scissors** — implementing error handling, input validation, and modular code structure.
- Devised unit tests covering 95% of the codebase, ensuring code quality and minimizing potential bugs.

Projects

Personal Portfolio Website

Tech Stack: HTML5, CSS3, JavaScript

- Designed and developed a fully responsive personal portfolio website from scratch using semantic HTML5, modern CSS3, and vanilla JavaScript — with no external frameworks.
- Implemented smooth UI/UX interactions including scroll-triggered animations, hover effects, and CSS keyframe transitions to deliver a polished, professional browsing experience.
- Ensured cross-browser compatibility and mobile-first responsiveness using CSS Flexbox and Grid layouts, optimized for various screen sizes and devices.
- Deployed the live site and maintained version control through Git; source code publicly available at **balajik-dev.vercel.app**.

EV Charge & Range Analysis — Visualization Dashboard

Tech Stack: Tableau, MySQL, SQL Databases, Exploratory Data Analysis

- Analysed Electric Vehicle adoption trends across India and global markets by integrating 4 heterogeneous datasets from multiple sources into a unified Tableau environment.
- Performed end-to-end Exploratory Data Analysis (EDA) using MySQL — cleaning, querying, and transforming raw EV data to extract meaningful insights on charge capacity, driving range, and market share.
- Designed and developed interactive Tableau dashboards and a multi-scene Story, incorporating diverse chart types (bar, line, map, scatter) to visualize EV performance metrics and regional adoption patterns.
- Connected Tableau to multiple data sources (MySQL databases, CSV/Excel files), demonstrating proficiency in cross-source data blending and live data connectivity.
- Integrated the final dashboard and story into a live web application; deployed and publicly accessible at **ev-analytics1.netlify.ap**.

Technical Skills

- **Languages:** Python, JavaScript, SQL
- **Front-End:** HTML5, CSS3, JavaScript (DOM Manipulation, Responsive Design)
- **Databases:** Oracle SQL (Functions, Joins, Sub-Queries, Normalisation), MySQL
- **Data & Analytics:** Data cleaning, validation, basic statistical analysis
- **Visualization:** Power BI, Tableau, Excel
- **Tools:** Git, GitHub, VS Code, Jupyter Notebook
- **Core CS:** DSA (basics), OOP

Certifications

- Deloitte — Data Analytics Job Simulation (Forage)
- IBM SkillsBuild — AI Literacy
- NPTEL — The Joy of Computing Using Python

Soft Skills

Communication — Team Collaboration — Adaptability — Problem Solving — Continuous Learning
